

DeepDrip™

TREE WATERING STAKES

DeepDrip™ stakes allow you to water and fertilize your trees at the roots, encouraging deeper roots and healthier trees. Water gets underground fast, so you can water for shorter periods and enjoy considerable water conservation. They also help aerate the soil with oxygen, and you can add fertilizer into the shaft to direct nutrients to the root zone. DeepDrip™ stakes work with a hose or automatic landscape drip systems, and come in three sizes. The 14.5" unit is ideal for small trees and shrubs with shallow roots, like rose bushes and ornamental trees (or in commercial use for trees still in boxes). The 24.5" stake is well-suited for most tree varieties except for palm trees and other deeper rooted trees, which will benefit from the longer 36" stakes.

The DeepDrip's reinforced tip and cap are made from ABS and the upper shaft is made from Schedule 40 PVC. Multiple holes in the bottom half of the spike, internally covered by a mesh filter, allow water to flow out but keep dirt from getting in and clogging the tube. The UV-protected cap acts as a reinforced cover when pounding the stake into the ground, keeps debris from entering the shaft and holds a 1/4" drip line/emitter securely in place. By inserting a screwdriver through the two holes at the top of the upper shaft, stakes can be easily pulled up to remove/reposition as trees grow or rotated to deter root invasion.

DeepDrip™ watering stakes can be installed during or after tree planting. Once in, you have instant access to the root system for fertilizer delivery or to set up deep automatic drip watering.

ordering

- Part # A-DD14 - DeepDrip™ 14.5" stake
- Part # A-DD24 - DeepDrip™ 24.5" stake
- Part # A-DD36 - DeepDrip™ 36" stake

MicroEase™

MICRO-IRRIGATION KITS

Convert your current, inefficient irrigation system into a highly effective, low-maintenance, water-saving drip system. MicroEase™ kits can connect to a water faucet, existing sprinkler system or 1/2" riser. This provides efficient, low volume irrigation ideal for golf clubhouse surrounds as well as other shrub and planter areas.

PRO KIT (faucet connection)

CONVERSION KIT (sprinkler/riser connection)
