

Nastek™

EARLY STRESS DETECTION GLASSES

Disease, drought and weed invasion are plant and turf killers. But by the time you see them it can be too late. Nastek™ glasses, with stress detection technology developed by NASA, lets you “see into the future” to identify problems 2-10 days before they are visible to your naked eye. Keep your turf and vegetation healthy BEFORE serious problems arise.

how does it work?

Dying vegetation signals distress with changes in how it absorbs and reflects sunlight. The earliest signals occur at the outer limits of the human visual spectrum, and are rendered invisible compared to the predominant middle wavelengths. Nastek™ Early Stress Detection Glasses filter the overpowering light in the center so that the fringe spectra, which show early plant stress, become visible!

STRESS DETECTION GUIDE

fusarium patch

pythium blight

yellow patch (rhizoctonia)

brown patch

anthracnose

get a jump on broken or poor-performing sprinklers

highly efficient spot watering saves time and labor costs

poa grass invasion identified BEFORE it takes over

superior weed location and spraying saves time and money

Nastek™ Deluxe Edition includes shatterproof polycarbonate stress detection lens in “Aero II” frame, cleaning cloth and case, plus a FREE sun protection lens.

Nastek™ Standard Edition includes shatterproof polycarbonate stress detection lens in sport frame and lightweight case.

Nastek™ Clip-on glasses include shatterproof polycarbonate stress detection lenses and hard clamshell case.
